## PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate with 800+ hours of hands-on industry experience in full-stack web development, IT technical support, database development, systems administration, networking, and IoT. Experienced in developing and enhancing web applications using PHP, JavaScript, MySQL, HTML5, CSS3, Bootstrap, jQuery, and AJAX. Provides Tier 1 and Tier 2 technical support for hardware, software, networking, IP telephony, Active Directory, and endpoint security. Experienced in database design, system deployment, user acceptance testing, troubleshooting, and process improvement. Proven ability to troubleshoot technical issues, develop process improvements, collaborate with stakeholders, and support IT operations in an organizational environment.

## TECHNICAL SKILLS

- **Programming & Web Development:** PHP, JavaScript, HTML5, CSS3, Bootstrap, jQuery, AJAX, C++, C#, Java, Python
- **Databases:** MySQL, SQL, PL/SQL
- **IT Support & Systems Administration:** Tier 1/Tier 2 Technical Support, Hardware Troubleshooting, Software Troubleshooting, Network Troubleshooting, Active Directory, BitLocker Encryption, OS Deployment, System Troubleshooting, Hardware Maintenance, IP Telephony
- **Networking:** Cisco Routing & Switching, Cisco Packet Tracer, TCP/IP, Network Troubleshooting
- **Cloud, IoT & Emerging Technologies:** Oracle Cloud Infrastructure (OCI), Microsoft Azure, Internet of Things (IoT), ESP32, Microcontrollers, Embedded Systems, Arduino
- **Tools & Platforms:** Git, GitHub, Visual Studio Code, Salesforce, Microsoft Office, Google Workspace, Ventoy
- **Other:** User Acceptance Testing (UAT), Performance Testing, Technical Documentation, IT Procurement Support, Staff Training

## WORK EXPERIENCE

**Department of Agriculture (DA-ICTS)**

**April 2026 - May 2026**

*Full-Stack Software Developer / Programmer Intern*

*Cross-Assigned to Fertilizer and Pesticide Authority (FPA)*

- Developed and enhanced features for the FPA Leave Management System using PHP and JavaScript, digitizing manual leave-processing workflows.
- Designed and structured a MySQL database to automate complex leave credit calculations and improve the accuracy and tracking of employee leave records.
- Built and implemented an automated document routing engine within the Leave Application module, enhancing compliance and reducing approval times.
- Developed responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap in accordance with government standards.
- Conducted user acceptance testing (UAT) to identify system issues, contributing to improved application stability before deployment.

- Delivered tier-1 and tier-2 troubleshooting support for hardware, network, and IP telephony across various agency offices, ensuring minimal downtime.
- Managed full OS and software image deployments using Ventoy, reducing deployment time by ~40% while securing data backups.
- Resolved security incidents involving BitLocker encryption and Active Directory login issues, enhancing the security posture of organizational assets.
- Assisted in IT procurement processes and documentation, improving efficiency in resource management.
- Facilitated training sessions for new IT staff, bolstering team capabilities in technical support and troubleshooting.

**BlastAsia Inc.****March 2020 - March 2020***Front-end Website Developer Intern**Ortigas Center, Pasig City*

- Maintained and enhanced current features of the responsive front-end designs using Bootstrap, enhancing user experience across multiple devices.
- Collaborated with development teams to integrate functionalities utilizing GitHub for version control and code management.
- Utilized Visual Studio Code for efficient coding and debugging, streamlining the development process.
- Implemented cross-browser compatibility features, ensuring consistent performance for all users.
- Participated in code reviews, providing and receiving feedback to consistently improve coding practices and application performance.

## PROJECTS

---

**iBaryo: Barangay Inventory and Resource Tracking System***Freelance Full Stack Programmer (Front-End & Back-End) / Database Consultant & Designer***November 2025 - May 2026**

- Commissioned to develop and deploy an internal web-based inventory and resource tracking system for barangay operations, replacing manual recordkeeping workflows with a centralized digital platform.
- Developed the Inventory Management and Resource Tracking modules, enabling users to manage inventory items, monitor supplies, resources, transactions, availability, and track resource movement.
- Designed and structured the system's MySQL database, including data relationships and storage structures to support inventory and resource management workflows.
- Developed responsive front-end and back-end functionality using PHP, MySQL, JavaScript, jQuery, AJAX, HTML, CSS, and Bootstrap.
- Deployed the completed system as an internal intranet application for the client, supporting centralized access within the organization's network.
- Improved manual recording workflows by approximately 30–40% and increased resource tracking accuracy by approximately 50–60% based on client/project evaluation.

AutoPet: Smart Pet Feeder and Hydration System with Real-Time Camera Access and Voice Feature for Furr Society

April 2025 - October 2025

Front-end and Back-end Developer/Programmer, IoT Hardware Engineer

- Engineered a prototype for a Smart Pet Feeder system, integrating real-time monitoring and voice features to enhance pet care efficiency.
- Utilized ESP32 microcontrollers and developed a mobile web application, facilitating remote feeding schedule management for pet care businesses.
- Collaborated with stakeholders to gather requirements and incorporate client feedback into the design process, ensuring user satisfaction.
- Optimized the system for scalability, enabling potential future enhancements and additional features based on user demands.
- Received 'Best in IoT-Device' award at the IT Exhibit, showcasing innovation and technical execution of the project.

Web-App Based Kiosk Ordering System for White House Cafe

November 2024 - March 2025

Front-end and Back-end Developer/Programmer

- Engineered a decentralized customer web order application, successfully decreasing checkout line queues by ~30% in a local café.
- Implemented user authentication and ticket logging features to streamline the ordering process, significantly improving customer experience.
- Leveraged GitHub for version control and collaboration, ensuring effective management of project workflow and documentation.
- Conducted performance testing and optimization, enhancing application responsiveness and speed under varying loads.
- Coordinated with cafe management for ongoing updates and improvements based on customer feedback, ensuring service relevance and satisfaction.

EDUCATION

National University - Asia Pacific College - Fairview Campus

2022 - 2026 | Graduated

Bachelor of Science in Information Technology with Specialization in Mobile and Internet Technology

MFI Polytechnic Institute Inc. - Ortigas Campus

2018 - 2020

Senior High School - ICT Computer Programming

CERTIFICATIONS & AWARDS

- Test of Practical Competence in IT (TOPCIT):** Level 3 Competent – Issued May 16, 2026
- Oracle Cloud Infrastructure 2023 Certified Foundations Associate:** Issued August 30, 2023
- Gemini Certified Student:** Issued December 01, 2025
- Agentblazer Workshop Completion Certificate:** Issued August 06, 2025
- Best in IoT-Device Award:** NU Fairview IT Exhibit – October 2025
- Dean’s List Honors (First Honors):** National University - Asia Pacific College (A.Y. 2022–2023, 2023–2024, 2024–2025, 2025 - 2026)

LANGUAGES

- English:** Professional Working Proficiency
- Filipino:** Native / Bilingual Proficiency
